Affordable Email Marketing

Email marketing works!

Email campaigns are an established medium for communicating with your customers. Ninety percent of consumers check email several times a day, according to a Double Click survey.

Forty-four percent of consumers report their use of email as "constant."

We can email to your own database or target consumers in your market based on selected criteria such as income, home ownership, or profession.

Our design staff will create dynamic HTML ads based on your input to coordinate with your current advertising.

Email marketing is a proven success for auto sales and service merchandising specials.

Our technology ensures delivery of 95 – 97% and our campaigns are 100% compliant against spam.

Prospects are compiled from your own email database and through the purchase of prospects in your market area that have double opted-in to receive email marketing promotions. Names are available from .03 to .55 depending on selection criteria and quantity purchased.

We are Can-Spam Act compliant and offer the prospects a one-click unsubscribe option.

Ads can be vehicle sale specific or service merchandising promotions. We offer many affordable programs including a one-time campaign to an ongoing 12 month campaign.

A Strategic Marketing Program entails efficient use of the top two marketing mediums, based on effective return on investment (ROI); this includes E-Mail Marketing as well as Direct Mail. Customer retention in the automotive industry is currently at 3-8%, which in our professional opinion, can be directly linked to the current vibe in the marketplace.

To begin picking up the pieces, not becoming them, we feel that it is best to first retain all of the customers who know and love your dealership name, then prospect to gain a greater market share. The most effective way to do this is through an attention-grabbing initial message, and a consistent follow-up campaign.

A third of the companies failed to send any mail at all to new subscribers in 30 days. - Return Path (2008)

According to Ad:Tech Attendees, 31% of US Marketing Executives surveyed say direct response programs (email and mailings) have greatest ROI, more than double all other marketing programs (p.r., event marketing, website, advertising). - *CMO Council* (2006)

Another added advantage to E-Mail and Direct Mail marketing is the ease and proficiency in tracking. A good campaign can determine many factors to ensure that you are getting the results you deserve.

30% of practicing marketers don't take the time to figure out their actual rate of delivery. - *MarketingSherpa "Email Marketing Benchmark Guide 2008"* (2008)

In the current marketplace, brand recognition is no longer acceptable and will not put money in your pocket. The key to success is an aggressive, real call-to-action.

Upon reading a case study that was done on Meade Automotive in the Detroit metro area, their first E-Mail marketing campaign produced over a 300% ROI. If somebody could guarantee results to run parallel with this case study, we would be sitting on an island somewhere; however through a targeted message to a precisely targeted audience, there is only success in our future.

Compliance is an important factor to us as well. You should work closely with your State Association; "squeaky clean" is a good rule of thumb.

Remember: Quality is not cheap, and cheap does not deliver.

E-mail and Direct Mail marketing proves time and time again to be a cost effective, high ROI-yielding, with easy-to-track results.
